Although we offer a variety of programs and services that have very specific goals, in all programs we believe in the healing power of collaborative and empowering relationships. We know that “therapeutic relationship” is one of the most important components of successful services. Our practice of acceptance, respect, and compassion toward all, fosters the level of openness and honesty needed for personal healing and progress. Our goal is to build a positive relationship with those we serve beginning at the time services are started and to maintain this relationship throughout each person’s journey with us.
